## ABOUT ME

I am a professional software engineer with strong expertise in backend development, cloud solutions, and web/mobile applications. My work spans from designing APIs and databases to deploying projects on Linux servers, AWS, and VPS platforms with tools like Docker and CI/CD pipelines. Beyond technical depth, I bring a wide range of general knowledge and problem-solving skills, which help me quickly adapt to new challenges, industries, and technologies. I've delivered solutions for businesses ranging from POS systems to blockchain contracts, always focused on practical results, reliability, and user value. I thrive in roles where I can combine technical ability with creative thinking, collaborate with diverse teams, and continuously learn while delivering meaningful contributions.

## TECH STACK

Backend: Node.js, Express.js, MongoDB, PostgreSQL, MySQL Frontend: React, Vue.js, Next.js, Vanilla JavaScript, Tailwind, Bootstrap, Lucide React Mobile & Hybrid: React Native (learning), Cordova Blockchain: Solidity, Hardhat Cloud & Hosting: AWS (EC2, Lambda, S3), DigitalOcean, Hetzner, Vultr Server Administration: Linux (Ubuntu) with Nginx for hosting & deployment Databases: MongoDB, PostgreSQL, MySQL DevOps & Tools: Docker, GitHub Actions (CI/CD), Git, GitHub Practices: REST APIs, POS systems, smart contract deployment, web hosting & scaling basics

## EXPERIENCE

Freelance Developer (Full Stack / Backend)

Remote | Jan 2023 – Present

- Designed and deployed full stack applications using Node.js, Express.js, React, and MongoDB, serving real business needs.
- Delivered Solidity-based smart contracts for fintech use cases, enabling secure daily micro-transactions.
- Configured and managed VPS servers (AWS, DigitalOcean, Hetzner, Vultr) with Linux + Nginx for client project hosting.
- Set up CI/CD pipelines with GitHub Actions to streamline deployments and improve reliability.
- Collaborated directly with non-technical clients, translating needs into working solutions that improved efficiency.

IT Support & In-House Developer – GPOWER Frozen Food

Lagos | 2022

- Built and deployed a custom POS system that reduced sales errors by 60% and improved daily reporting speed.
- Improved inventory tracking accuracy, preventing revenue leakage and ensuring stock availability.
- Provided end-to-end technical support for in-house systems, including backups and troubleshooting.
- Acted as the sole IT lead, handling both software development and support for day-to-day operations.

## PROJECTS

GigMe.space — Founder & Lead Developer

Personal platform designed to help freelancers showcase their skills and connect with potential clients. Full backend + frontend ownership.

Impact Grant Solutions — Lead & Sole Developer

Developed and deployed the full website and system for Impact Grant Solutions, handling end-to-end design, backend, frontend, and hosting.

■ Website: <https://impactgrantsolutions.org/>

➡■ More projects available on GitHub.

## EDUCATION & CERTIFICATIONS

NIIT Ajah Centre — Diploma in Software Engineering, Jan 2023 (Final Grade: C, Good) Cisco Networking Academy — Introduction to IoT (Sep 2018, KingdomIT, Netherlands) WAEC Certificate & High School Testimonial — Available on request

## INTERESTS & PASSIONS

- Exploring new development frameworks and tools - Reading technical documentation and staying updated on tech trends - Gaming and immersive digital experiences - Practicing meditation and mindfulness - Meeting new people and engaging in meaningful conversations - Finding ways to be useful and add value to people or projects - Practicing prayer and spiritual reflection - Stargazing and appreciating the quiet beauty of the night sky
